VISHAL RAO M

iOS Developer | SwiftUI & UIKit | Mobile Application Engineering

vishalrao5432@gmail.com | 6382190388 | linkedin.com/in/vishal-rao-173a232b9 | github.com/vishal-rao28 | vishalrao-portfolio.netlify.app

PROFESSIONAL SUMMARY

High-performing iOS Developer who was promoted from Intern to Full-Time Developer in just two months — a testament to fast learning and dependable delivery. Owns the full mobile application lifecycle end-to-end: designing sleek SwiftUI/UIKit interfaces, integrating RESTful APIs, and shipping polished apps live to the App Store. Currently doubles as a Technical Trainer, mentoring the next generation of iOS developers while driving quality across four testing disciplines (Selenium, Appium, load, and security testing). Combines strong engineering instincts with a builder's mindset — someone who ships fast, ships clean, and takes real ownership of outcomes.

PROFESSIONAL EXPERIENCE

iOS Developer & Technical Trainer — 2026 – Present

SIMATS Engineering Institution

- Serve as iOS Developer and Technical Trainer, blending hands-on development with mentorship for aspiring iOS engineers.
- Mentor students in Swift, SwiftUI, iOS architecture, debugging, and interview readiness, helping them build job-ready skills.
- Review student projects and deliver actionable technical, UI/UX, and code-quality feedback.
- Guide students through testing, project review, and App Store deployment to meet professional release standards.
- Collaborate cross-functionally with the testing team to validate student projects across iOS, Android, and Web platforms.
- Execute Selenium testing for web applications, validating functionality, workflows, and user interactions.
- Execute Appium testing for Android and iOS applications to ensure reliable mobile functionality.
- Conduct backend vulnerability testing to proactively identify security risks and strengthen application security.
- Run load testing to benchmark server stability, response time, and performance under real-world traffic conditions.
- Delivered structured testing coverage across four disciplines: Selenium, Appium, vulnerability, and load testing.
- Partner with development and QA teams to resolve defects and drive projects to successful deployment.

iOS Developer — Oct 2025 – Present

Viana Soft Private Limited (SIMATS Engineering Institution)

- Promoted from iOS Intern to Full-Time iOS Developer within 2 months in recognition of strong performance and delivery.
- Spearheaded development of “Viana 360,” a cross-device institutional application built for iPhone and iPad.
- Engineered a scalable, responsive UI in SwiftUI, ensuring visual and functional consistency across screen sizes and orientations.
- Owned the complete development lifecycle — requirement analysis, development, API integration, testing, and App Store deployment.
- Integrated and validated RESTful APIs using Postman to guarantee reliable, production-ready backend communication.
- Led end-to-end testing of the VBuy Food application across iOS devices, confirming functionality, UI consistency, and performance.
- Identified, documented, and resolved application defects, measurably improving reliability and user experience.
- Maintained clean, collaborative development workflows using Git for version control and code management.
- Managed application validation and supported the full App Store review and deployment process.
- Delivered the application within an aggressive ~3-month timeline and successfully launched it on the App Store.
- Continue to enhance the application with new features, defect fixes, and performance improvements.

TECHNICAL SKILLS

Programming Languages: Swift

Mobile Development: SwiftUI, UIKit, Xcode, Core Location, MapKit

Backend & Integration: Firebase (Realtime Database, Auth, Push Notifications), REST APIs

Testing & QA: Selenium (Web), Appium (Mobile), Backend Vulnerability Testing, Load Testing, Postman

Tools & Practices: Git, Agile Development, Code Review, UI/UX Best Practices

PROJECTS

School Bus Child Tracking System (iOS)

- Designed and built two companion iOS apps — a Parent App and Driver App — for real-time school bus tracking and safety.
- Parent App: delivered real-time bus location tracking using Core Location and MapKit.
- Driver App: enabled live trip updates and secure real-time location sharing.
- Powered both apps with Firebase Realtime Database and Firebase Authentication for secure data and role-based access.
- Crafted a clean, intuitive interface in SwiftUI and UIKit, with push notifications for trip alerts and status updates.

EDUCATION

Dhanalakshmi Srinivasan Engineering College, Perambalur **Nov 2021 – May 2025**
Bachelor of Technology in Artificial Intelligence and Data Science
CGPA: 7.5 (through 6th Semester)

Little Scholars Matric Hr. Sec. School, Thanjavur **Jul 2020 – Jun 2021**
HSC (12th Standard)
Percentage: 80%

Don Bosco Matric Hr. Sec. School, Thanjavur **Jul 2018 – Jun 2019**

SSLC (10th Standard)
Percentage: 66%

ADDITIONAL INFORMATION

Languages: Tamil, English, Marathi

Certifications: AWS – Cloud Computing Architecture (6 months)

Internship: iOS Development Intern, Greatify — AI-Enhanced ERP, LMS & Digital Exam Solutions (Jan 2025 – Jul 2025)

Publications: Research paper on iOS Development published in International Journal of Research Publication and Reviews (IJRPR)
